

Are your prescription medicines covered by your health plan?

Effective Jan. 1, 2025

If you use a noncovered drug, you may pay the full price.

Talk to your doctor about switching to one of the alternative drugs listed on the formulary.

NetResults™ is your formulary — a list of covered drugs

Prime Therapeutics (Prime) is trusted by your employer or health plan to help you get the medicine you need to feel better and live well. Our pharmacy experts work hard to make medicine more affordable for everyone.

NetResults is the list of drugs covered by your health plan. It was designed to push back against today's high costs for medicine. NetResults works by offering alternatives to more expensive drugs. This helps people get the right medicine at the best cost.

Some drugs will not be listed on the NetResults formulary

If a drug is not on the formulary, it will not be covered by your health plan. This publication lists many of the noncovered drugs along with alternative drugs that are covered. The list is divided into four sections:

1. Noncovered with preferred alternatives: alternatives to noncovered drugs — potential options at better costs
2. Standard noncovered drugs: lists reasons why these drugs are not covered

Additionally, some health plans or groups may choose not to cover drugs for the following reasons:

3. Noncovered with over-the-counter alternatives: for prescription drugs that have an effective medicine available from your pharmacy
4. Noncovered due to high costs: safe, effective alternatives available at lower costs

The formulary guide represents changes (noncovered and covered alternatives) that may not be effective until January 1, 2025. The formulary is reviewed quarterly and changes are made to ensure clinical appropriateness of the formulary while giving members access to lower cost alternatives. Notifications are sent out each quarter to affected members of new noncovered drugs.
